

Drum Clamp

Drum Clamp - Forklifts are utilized to handle moving, lifting and storing pallets. For facilities which handle items in drums, you will need to use an attachment to lift, store and move them. There are various drum forklift accessories which you can get for all of your drum storing, moving and lifting requirements. These attachments are particularly used in order to handle drum containers - thus there is no chance of damage to the item or drum container whenever they are moved, lifted or stored.

Drum Positioner And Grab

The drum positioner could be utilized to load and unload drums off of drum stands, vehicles and racks. These are accessible in three or four tine models. This accessory is completely mechanical, hence enabling the one operating it to be able to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This particular accessory is intended for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed purpose of dealing with metal drums which have rolling hoops. Although the initial purpose for the design was to handle steel drums with rolling hoops, the drum grab could help accommodate plastic drums also. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is another lift truck attachment which mounts onto the forks themselves. Their purpose is to pick up the drum and turn it upside down. The drum is clamped into the drum rotator utilizing a clamp which fits around the middle of the drum. The rotation is done by either a continuous loop chain or a crank handle. The crank handle is utilized for operations which happen beneath shoulder level. For operations which must take place over shoulder level, the continuous loop chain will be used.

Drum tines are straightforward fork mounted accessory which can be used for stacking and unstacking 210-liter steel drums. Stacking requires nothing intricate, just easy horizontal placement of the drums. The carriage-mounted attachments reduce the load center of the drums.

Automatic Tongs

Drum tongs come in both semi-automatic and automatic units which could be utilized in the tight head and open topped metal drum kinds. The drum tongs could also be attached in many different ways to the lift truck. One way is to attach them underneath a fork-mounted hook. One more way is to connect them to a fork-mounted jib or a carriage mounted jib. Both the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no need for the one operating it to ever leave the seat of the lift truck.

Rim Grip Handler

When drums need storage space with inadequate area available, the Rim Grip Drum Handler is the ideal alternative in drum forklift accessories. This accessory will work for both the two hundred ten liter drums along with one hundred twenty liter drums. The Rim Grip Handler works by using metal jaws so as to hold the rim of the drum. It lifts the drum and sets it down without needing any space between all of the drums. The standard unit in the industry is a zinc-plated handler, although, this particular accessory comes accessible in stainless steel for the food and drink industry.
