

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV trip. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could promptly and securely elevate people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a joint venture with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they built and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

JLG lift trucks have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the company proudly continues to expand itself into many marketplaces worldwide and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
